                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  i                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Uden, M. and Mitrophanous, K.

 ```
cultivar) were infected with pathogen (isolate FRM421 of Collectrichum graminicola, which is a sorghum isolate). RNA was prepared from infected leaves harvested from 45 seedlings 48 hours after inoculation. Note: young seedlings (2 weeks old) exhibit juvenile resistant reaction, which is an incompatible interaction. As they grow older (4 weeks or older), plants resume susceptiblity to anthracnose disease. The library was made from poly-A RNA in the cloning vector lambda ZAP II. Clones to be sequenced were prepared by mass excision. WARNING: While most or all ESTs are expected to derive from the host the pathogen."
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        irom 8-week-old plants; Vector: pBluescript II from Lambda Zap II, Site_1: XhoI; Site_2: EcoRI; The library was made from poly-A RNA in the clouing vector lambda ZAP II. Clones to be sequenced were prepared by mass exrision."

Another Torning of Anthropour Intervent of Promother Torning of Anthronose-infected leaves from two-week-old sorghum plants 48 hr after inoculation; Vector: pBluescript II from Lambda Zap II; Site_1. XhoI, Site_2: EcoRI; Two-week-old sorghum plants (BTX 623 cultivar) were infected with pathogen (isolate FRM421 of Colletotrichum graminicola, which is a sorghum isolate). RNA was prepared from infected leaves harvested from 45 seedlings (2 weeks old) exhibit juvenile resistant reaction, which is an incompatible interaction. As they grow older (4 weeks or older), plants resume susceptiblity to authrachose disease. The library was made from poly-A RNA in the cloning vector lambda ZAP II. Chars to be

Synthetic Env and Gag expression cassettes exhibit increased potency for induction of cytotoxic T-lymphocyte (CTL) responses by DNA immunication. Gag of HIV-1 self-assemble into non-infectious virus-like particles which are used as a matrix for the proper presentation of an antigen entrapped or associated to the immune system of the host.
                                                                                                    production of Gay-and/or English proteins. Synthetic Env and Gag expression cassettes exhibit increased potency for induction of cytotoxic T-lymphocyte (CTL) responses by DNA immunization. Gag of HIV-1 self-assemble into non-infectious virus-like particles which are used as a matrix for the proper presentation of an antigen entrapped or associated to the immune system of the host.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Polynucleotide encoding antigenic type C HIV Gag polypriptide or a HIV Env polypeptide and the polypeptide useful for immunizing a mammal especially human against HIV

Synthetic Env and Gag expression cassettes exhibit increased potency for induction of cytotoxic T-lymphocyte (CTL) responses by DNA immunization. Gag of HIV-1 self-assemble into non-infectious virus-like particles which are used as a matrix for the proper presentation of an antigen entiapped or associated to the immune system of the host.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Polynucleotide encoding antiqueic type C HIV Gag polypeptide or a HIV Env polypeptide and the polypeptide useful for immunizing a mammal especially human against HIV

The present sequence is the coding sequence of HIV p55 Gag Major Homology Region. This sequence is located within the p24-CA sequence of Gag. Mutations in this region can severely impair particle production.

The Gag protein of HIV is needed for the assembly of virus-like particles. In addition, the Gag protein is involved in many stages of the HIV life eyele, including assembly, virion maturation after particle release and early post entry steps in viral replication. The expression

                                                                                                                                                                                                                                                                                                                                   comprising the coding sequence for a heterologous envelope protein and a third retroviral nucleotide sequence comprising a DNA sequence of interest and lentivirus, preferably HIV. cis-acting sequences required for packaging, reverse transcription and integration. The packaging real lines and viral particles can be used for gene therapy or gene replacement with improved safety. They can also be used in the development and production of varcines and biochemical reagents. The present sequence is a gag coding region of codon optimised HIV gaypol sequence. This sequence is used in the packaging cell line. Codon optimisation results in improved expression of the gaypol protein and reduces the risk of recombination between the transfer
                                                                                                                                                                                                                                                    The patent discloses new packaging cell line for producing a viral accessory protein independent lentivirus, preferably human immunodeficiency virus (HIV), delived letroviral vector particles. The packaging cell line comprises a mammalian cell, a retroviral DNA comprising a coding sequence for a lentivirus, preferably HIV, gagpol, where the coding sequence has been mutagenised to improve expression of the viral gagpol proteins, a second retroviral nucleotide sequence.

```
The present sequence is the coding sequence of a HIV Gag expression cassette, Gag.ModSF2. The Gag protein of HIV is needed for the assembly of virus-like particles, in addition, the Gag protein is involved in main stages of the HIV life cycle, including assembly, virion maturation after particle release and early post-entry steps in viral replication. The expression cassette may be used for the recombinant expression of HIV Gag-polypeptides which may then be used to vaccinate against HIV infection and acquired immunodeficiency syndrome (AIDS).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             862 gacateegeeagggeeecaaggageeetteegegaetaegtggaeegettetacaagaee 921

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    AAA70415
                                                                                                                           100
                                                                                                                                                                                                                                                                              The present sequence is the coding sequence of a HIV Gag protease expression cassette, GagFrot.MedS. The Gag protein of HIV is needed for the assembly of virus like particles. In addition, the Gag protein is involved in many stages of the HIV life cycle, including assembly, virion maturation after particle release and early post entry steps in viral replication. The expression cassette may be used for the recombinant expression of HIV Gag-polypeptides which may then be used to vaccinate against HIV infection and acquired immunodeliciency syndrome (AIDS).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              The present sequence is the coding sequence of a HIV Gaq-profease expression cassette, GaqProtMwd.SF2 (GPI). The Gaq profein of HIV is needed for the assembly of virus-like particles. In addition, the Gaq profein is involved in many stages of the HIV life cycle, including assembly, virion maturation after particle release and early post-entry stops in viral replication. The expression cassette may be used for the recombinant expression of HIV Gag-polypeptides which may then be used to
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      HIV dag professe expression cassette coding sequence GagProtMod.SF2(GPI).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      vaccinate against HIV infection and acquired immunodeficiency syndrome

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 expression cassette, GagProtMod.SF2(Gi2). The Gag protein of HIV is needed for the assembly of virus-like particles. In addition, the Gag protein is involved in many stages of the HIV lite cycle, including assembly, virion maturation after particle release and early post-entry steps in viral replication. The expression cassette may be used for the recombinant expression of HIV Gag polypeptides which may then be used to vaccinate against HIV infection and acquired immunodeficiency syndrome

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        The present sequence is a HIV Gag/Hepatitis C virus (HCV) core fusion coding sequence. The Gag protein of HIV is needed for the assembly of virus-like particles. In addition, the Gag protein is involved in Many stages of the HIV life cycle, including assembly, virion maturation after particle release and early post-entry steps in viral replication. The present invention relates to synthetic HIV Gag expression cassettes. The present sequence was cloned and used to generate the expression cassettes of the present invention. The expression cassettes may be used for the recombinant expression of HIV Gag-polypeptides which may then be used to vaccinate against HIV infection and acquired immunodeficiency syndiome

```
The present sequence is the coding sequence of a HIV Gaq-polymerase expression cassette, Gaqpol ModSF. The Gag protein of HIV is needed for the assembly of virus-like particles. In addition, the Gag protein is involved in many stages of the HIV life cycle, including assembly, virion maturation after particle release and early post ontry steps in viral replication. The expression cassette may be used for the recombinant expression of HIV Gag polypeptides which may then be used to vaccinate agains? HIV intention and adquired immunodeficiency syndrome (AIDS).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Expression cassettes encoding the human immunodeficiency virus (HIV) Gag-containing polypeptide useful for vaccinating against HIV infections and acquired immunodeficiency syndrome (AIDS) -
